**Module:** Manage Internal Documentation(MID) & API Centre

**Release Date:** 05/08/2021

**Title of Item:** Introducing Audit view section for MID section to store Feed documents - FLYsearch function and API settings

**Description:** Now, we have implemented the flysearch functionality and the feed receiving settings for the newly introduced Audit View Section under Manage Internal Documentation(MID). Details as below -

1. In API >> Settings >> Destination >> After selecting the MID section >> we need to add option for Audit view.

Note: The Audit view option would be available based on permission updated in Masters >> Manage internal files >> Ticking Audit view for particular MID.

2. In MID >> FLYsearch >> Type of search should have Audit view option to select after selecting the MID section.

**Title of Item:** Able to Attach multiple documents from Different Pages at Once in Box search

**Description:** User will be able to attach multiple documents from multiple page to a single WP at one go inside Box search. After doing the Box search, user are now able to select multiple documents and able to select destination combo box where user want to attach. Once after selection user will change the page for further selection or select other tabs or ribbon or other aircraft etc.

After moving the page or other section, already selected documents and combo box will not get vanished and selected should be there. Also, System will show how many documents are selected in previous and update the count with the new selection on other pages. Once attaching the document. User reverted back Box search page where documents selection will be vanished. But Combo box selection will not get reset and still be selected.

Only grid will be refreshed.

**Module:** Maintenance Control Centre

**Release Date:** 18/08/2021

**Title of Item:** In MCC, document status radio buttons should be controllable to save/update based on the users permission for both third party and main clients.

**Description:** Now, we can control the document status permissions for main client users and third party users based on permissions. From Users >> Manage Group Rights, we will have separate check boxes for providing the access of document statuses individually(Same applies to the Third-Party Manage Group right). Additionally, for saving/updating the document statuses as well, we will have option to provide the permissions.
