

In MCC >> Manage By Date & Manage By Asset >> Listing 'YES' rows window, we now have a dropdown called view type.

1. The View type dropdown would have the options Listing view and Document View. By default, the Listing view would be selected.
2. When the user is selecting the 'Document view' option. then it will load a new window.
3. In the new window, user can have all the functions as available in Audit view >> Attached view section.
4. The window would have all the documents one by one row.
5. User can see the options under Manage Documents >> Split, Extract and Download to PC.
6. The documents will be available based on document groups row by row.

Our main intention is to develop this section for document audit for all the rows and download it to PC in one go

The screenshot displays the 'Workpacks/ Work Orders' interface for '2nd August 2021 » WP.413576'. The top navigation bar includes 'Client' (Swiss), 'Year' (2021), 'Month' (August), 'Day' (2nd), and 'Number of Documents' (20). A 'Work Status' indicator shows '20 Documents Approved'. Below this, there are filter options, a 'FREEZE PANE' toggle, and a 'View Type' dropdown menu. The 'View Type' dropdown is highlighted, showing options for 'Document View', 'Listing View', and 'Thumbnail View'. The main content area is divided into several sections: 'Currently in Work with Nobody', 'Document History', 'Comments', 'Notes', and 'Review Management'. The 'Document History' section shows details for a document scanned on 02-08-2021. The 'Notes' section includes fields for 'Select Main Client Users', 'Select Client User', and 'Assign Responsibility To'. The 'Review Management' section has a checkbox for 'Currently in Work with Nobody'. The interface also features a search bar, a 'MANAGE DOCUMENTS' button, and a 'SEND NOTE' button.

Thank you!
