

# Software Enhancement Report

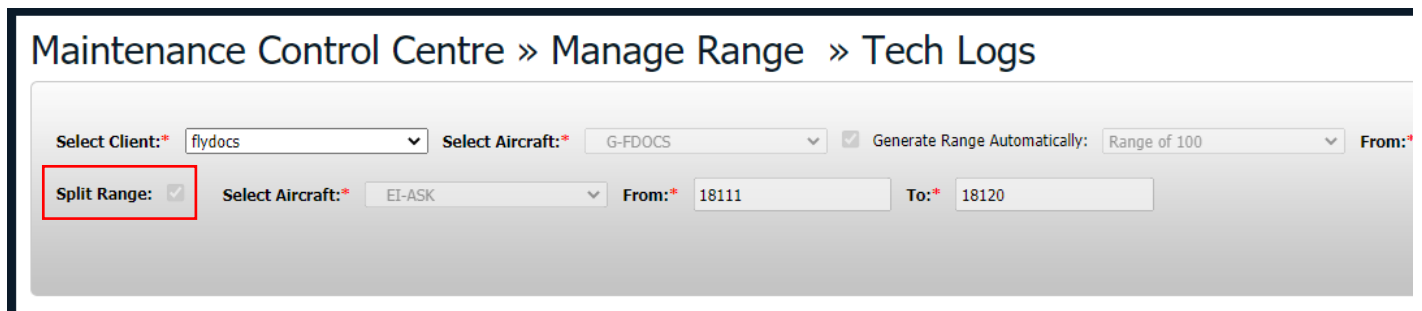

**Module:** Maintenance Control Centre >> Manage Range

**Release Date:** 09/07/2021

**Title of Item:** Ability to split the reference number report batches based on Mange range changes

**Description:** In MCC >> From MCC >> Manage By Date >> Controls >> Manage Range, Now we have option to split the Ranges defined for a particular client.

For Example : 1 to 10 is assigned to G-VAST. now 4 to 6 is split AAP aircraft then reference number report should show 1,2,3,7,8,9,10 for G-VAST and 4,5,6 should show under AAP.

**Module:** Masters

**Release Date:** 06/07/2021

**Title of Item:** Introducing Master Tag type module to manage folder tags based on clients

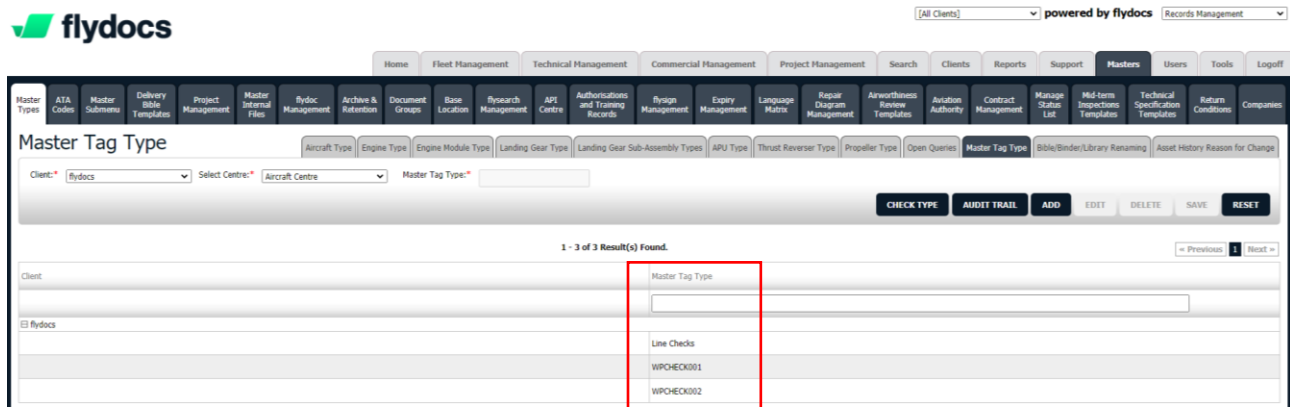

**Description:** From Masters >> Master Tag Type, Now we can add any number of new tags to update MH folders as per client requirement. which will be editable.

We have renamed Masters >> Masters Types >> Check type into Master Tag Types. When user clicks on Master Tag types, there we have options to Select Client, Select Centre, Tag Name. The Buttons are CHECK TYPE, AUDIT TRAIL, ADD, EDIT, DELETE, SAVE and RESET. When user can click on check type then it will open current check type window.

The grid columns would be Client, Tag Name.

Note : The added Tag/Type (Either Master Tag or check type) will get reflected under that particular client when clicking on 'Link to Inventory' option on MH of any Centre.

The newly added tags will get reflected in required sections including FSCC.

**Module:** Maintenance Control Centre >> Reports

**Release Date:** 12/07/2021

**Title of Item:** Enhancement on reference number report to update the missing status manually

**Description:** Now, we have the functionality to edit the reference status manually into Missing status and save it, directly from the Reference Number Report.

In MCC >> Manage By Date >> Reports >> Reference Number Report, We have the button called UPDATE STATUS. When the user clicks on the asset from the grid results, then the UPDATE STATUS button will be enabled. After clicking on the Update Status Button, a new window will open. We will have the option to update the Reference Status and Base Location.

NOTE : In the new window, we will have the title as Header: Update Reference Status / Base Location. we will have two options in the dropdown.

1. Update Reference status Option : Check boxes will be enabled for Reference Number having statuses except Missing Check(As we need to update the status with this one). Check the boxes and then click on SAVE, The Status will then be saved as "Missing Check".
2. Update Base Location option : once User selects this, Check boxes will be enabled for all the reference Number. Once checking the boxes, User will need to select the Base Location from the "Select Base Location option" then click on SAVE.

Update Reference Status / Base Location

Reference Status / Base Location: \* Update Reference Status

**Module:** Reports >> Current Status Management Information Report

**Release Date:** 15/07/2021

**Title of Item:** Ability in exporting CS FLYdocs user, Main client, and third party notes for all the tabs for the specific asset from CSMIR section.

**Description:** Now users can export reports for multi-aircraft and multi CS tabs at the same time. also, the downloaded report would be sent by mail.

In CSMIR >> Current Status Notes Tracking Report >> When we select the centre from the dropdown then next it will show Asset selection.

- User will be able to choose multiple assets from the dropdown(By using Shift Key function).
- Now once after the selection of assets the next dropdown will be available for to choose multiple CS sections(By using Shift Key function).Then, click on export.
- The export will download the files like each excel file for each asset and each asset excel file has multiple sheets for different CS tabs.
