Module: Maintenance Control Centre

Release Date: 11/06/2021

Title of Item: MCC Manage By Date >> Search window should have the centre selection

Description: In MCC >>Manage By Date >> Search(MCC Search and Listing Global Search), we now have ability to select the Centres as well so that we will be able to filter as per our requirement without going into a particular tab and then clicking on Search.

1. If User clicks on MCC Search, then after selecting the client, an option will be available for selecting Centres i.e. Aircraft, Engine, APU, etc. and then the sub sections under those tabs will be available to select.

- Include Deleted Documents

Search Tips.....

When searching, please remember that keywords and phrases are written in different ways by different people. As a simple example, E0123-456-789 may be written in any of the following ways:

- E0123-456-789
- EO 123 456 789
- E0123/456/789
- 123-456-789

You can search for all of these options at the same time in flydocs- please use the most suitable option when searching in order to get closer to the files you want.

Use Keyword(s) with at least three characters in any of the field to search.

- Keywords less than three characters are not searchable.
