# Software Enhancement Report

Module: Fleet Management >> All Centres >> Maintenance History
Release Date: 12/05/2021
Title of Item: PDF URL functionality available for multiple documents inside a folder in Maintenance History
Description: In Maintenance History for all centres, FLYdocs now has functionality to create a multi-page PDF URL. This will ensure a link will be provided for up to 150 files in one go, instead of creating a PDF URL for individual documents. This will be time saving for the user.
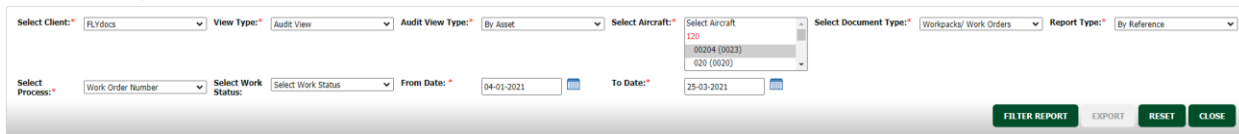

Module: Maintenance Control Centre
Release Date: 11/05/2021
Title of Item: Enhancing MCC >> Work status report for Audit view to show issue raised documents from review management
Description: In MCC >> Manage by Date >> Reports >> Work Status Report, FLYdocs has added a "View Type" dropdown situated next to the Client selection and Document Type dropdown, with the options being Audit view and Listing view.
When Audit view is selected, the next dropdown will ask for the type of Audit View. The three options will be: By Dynamic Group, By Other Group and By Asset. This option will ensure the report has the option of providing Listing View and Audit View.

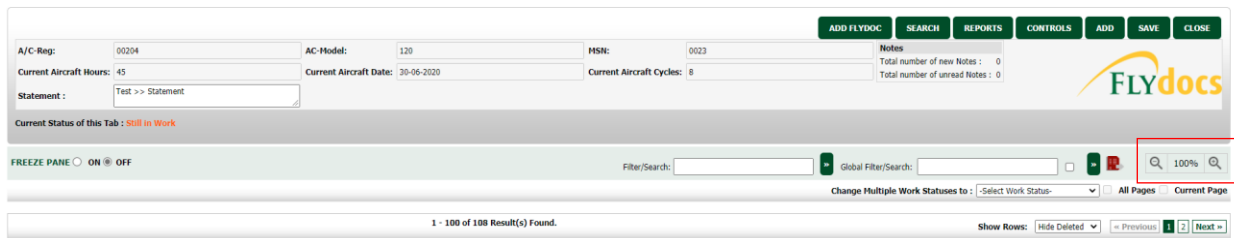

Module: Fleet Management >> All Centres >> All Current Status Tabs
Release Date: 11/05/2021
Title of Item: Add a zoom scale functions to increase zoom from 100% to 200% and decrease zoom up to 200% to allow the user to adjust the table size.
Description: FLYdocs has now added a zoom scale function, which will allow the user to zoom in or out on any tab within Current Status. This will remove the need to do it using browser settings. This enhancement will especially come in handy when there are a lot of columns within a Current Status tab. The zooming scale is from 60% to 160%, and once set progress is permanently saved on the CS tab. Zoom scale would need to be set for each individual tab by the user.

Module: Maintenance Control Centre
Release Date: 21/05/2021
Title of Item: Restricting inactive third-party users from being available in the Assigned Query Report
Description: Now in MCC >> Manage by Date >> Assigned Query Report, inactive users will not be available to view.

Module: Email
Release Date: 17/05/2021
Title of Item: Ability to include Aircraft details in notes for Email inbox notification
Description: Aircraft information and FLYdocs tab information such as a CS tab will be included on emails which are sent every 24 hours to the user.
