FLYdocs

Software Enhancement Report

May 2021

Module: Current Status, Mid-Term Inspection, Contract Management, Maintenance History
**Release Date:** 29/04/2021
Title of Item: Secure URL of Copy to clip board functionality that user share's outside FLYdocs system
Description: FLYdocs has now enhanced the 'Get PDF URL' functionality even further. Previously, a user with relevant permissions within the FLYdocs platform could share a PDF URL, however options within that were limited. Therefore, we have added two options that controls the number of days the link is available for, as well as controlling the link for users with or without logins to FLYdocs.

Having this functionality ensures client data is kept secure and can be managed in a more controllable manner.

Module: Fleet Management >> Maintenance Control Centre
Release Date: 28/04/2021
Title of Item: In MCC Enhancing 'Manage by Document Type' module for third party users
Description: For several clients, the new Manage by Document Type has been enabled which ensures Workpack information can be viewed on one page, as well as having the functionality to manage various work statuses. However, this is now available for third party clients, with the relevant permissions assigned from the main client user.

Module: Login
Release Date: 27/04/2021
Title of Item: Display error message for inactive users (Main + Third party) informing that the account is inactive
Description: If an 'Inactive' user tries to login to FLYdocs, FLYdocs will now display an error message that the "FLYdocs account is Inactive, please contact FLYdocs Administrator." This will ensure the user is told at the very first instance which will help in the troubleshooting process.
