

# Software Enhancement Report

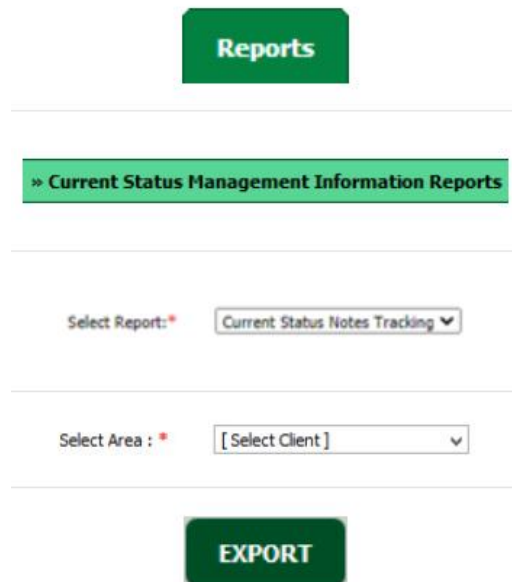

April 2021

**Module:** Fleet Management >> Current Status

**Release Date:** 14/04/2021

**Title of Item:** Ability in exporting CS FLYdocs user, Main client, and third-party notes for all the tabs for specific asset from CSMIR section

**Description:** In Reports >> Current Status Management Information Report, there is now a new dropdown named 'Current Status Notes Tracking Report'. User can select the Client from the resulting drop-down and relevant Centre and then select appropriate Aircraft. Section of Current Status can then be selected. Select Export to see report. As a result, this gives the user a greater overview of notes used between various types of clients in Current Status.

EXPORT

**Module:** Masters >> API (Aircraft, Engine, LDG, APU and Propeller Centre)  
**Release Date:** 23/04/2021

**Title of Item:** Ability to exclude the subsidiary client EOL asset from feed through primary client feed settings.

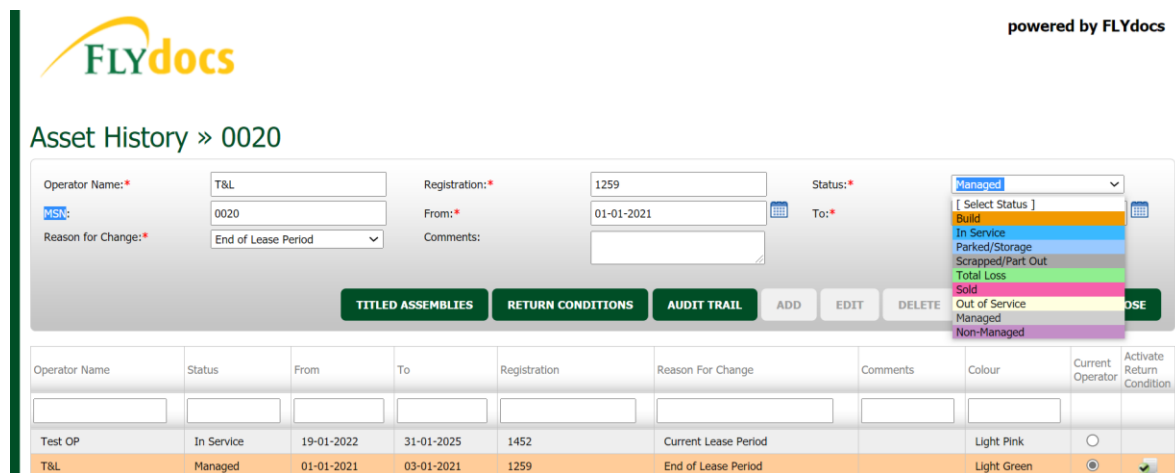

**Description:** FLYdocs now has an option to exclude A/C in a feed from being updated automatically via feed. For example, if there is an EOL aircraft, this aircraft from being excluded from having its Current Status feeds updated.

**Module:** Fleet Management >> Asset History

**Release Date:** 23/04/2021

**Title of Item:** Need to add two work statuses Managed and Non-Managed under Asset History Status.

**Description:** FLYdocs has now added two new status values in Asset History – Managed and Unmanaged. The clients on the Asset History Page will have manageable clarity of the exact status of the Aircraft according to the organization’s requirement.
