Software Enhancement Report

February 2021

Module: Maintenance Control Centre >> General Components >> Release Certs

Release Date: 12/02/21

Title of Item: General components documents in Box search >> Show next/previous

documents & open folder

Description: This enhancement is applicable for when a user is searching for documents belonging to the General Components >> Release Certs area. If the user selects the Next/Previous documents option, a new window will appear. On the new page under "Manage Documents", "Merge, "Download to PC" and "Split/Extract" options will now be available.

Module: Current Status Search & Maintenance Control Centre Search

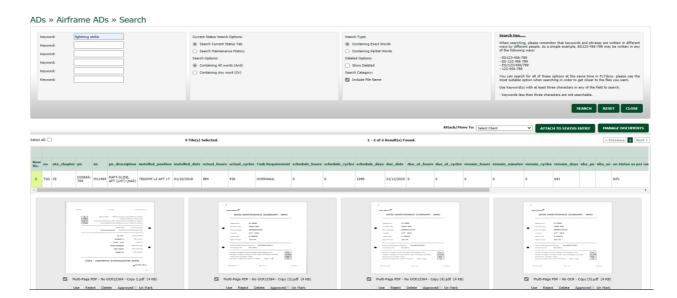

Release Date: 11/02/2021

Title of Item: Document Selection Shortcut and Improvement on CS Search area and

MCC Search Area

Description: Using shift key functionality, users can now select multiple documents in

the Current Status and Maintenance Control Centre sections.

Software Enhancement Report

February 2021

Module: Users >> Reports Release Date: 09/02/21

Title of Item: To add a column to the user list report export that displays the last login

date

Description: In the main Users Report, when exported to excel, a new column has been added named "Last Login Date". This will show the last time a user logged into FLYdocs.
